DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, 15-20, drawn to a system for coupling at least one atom and at least one hour-glass mode and converting quantum electrodynamic vacuum cavity fluctuations electromagnetic radiation energy to electrical and to a superconductive vortex implosion propulsion energy, classified in class 244, subclass 158R.
- II. Claims 4-12 and 21, drawn to a system for converting quantum electrodynamic cavity vacuum fluctuations or zero point electromagnetic radiation energy to electrical and implosion propulsion energy, classified in class 60.
- III. Claim 13, drawn to a system for converting incident quantum electro dynamic zero point electromagnetic radiation energy to electrical implosion propulsion energy, classified in class 244, subclass 62.
- IV. Claim 14, drawn to a winged craft, classified in class 244, subclass 117R.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be

separately usable. In the instant case, invention I has separate utility such as it can be used in non flying vehicles. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
